Key Functions of SaveHeart VHM Cabinets

**Athletic Fields + Parks + Schools/Universities + Tennis/Pickle/Basketball Courts
Trails + Town Centers + Beaches/Pool + Golf Courses + Marinas + HOAs/Residential**

Attractive, Durable, All-Weather Construction

- ♥ Made in USA of highest-quality, durable aluminum with a weather-resistant powder coat finish; Back-lit top for increased visibility
- ♥ Impact-resistant transparent polycarbonate cabinet door treated to minimize greenhouse effect
- ♥ Come standard in red & white; Other color combinations available; Custom decals & design available for sponsorship, dedication & advertising
- ♥ Climate-controlled cabinet provides ventilation or heating to ensure that AED is kept at optimal operating temperature

Reliable, Safe, Installation Ready

- ♥ Pre-wired electrical set-up includes installation-ready power supply, waterproof junction box & 24V DC converter for extra-low voltage safety
- ♥ Rechargeable Backup Battery powers essential functions in event of power outage
- ♥ Multi-carrier SIM card pre-installed & 4 years of data & system access included; Easy-to-follow installation guides & expert customer support

When the Cabinet Door is Opened

- ♥ Immediate alerts can be sent via SMS / text to target emergency contact(s)
- ♥ Loud alarm sounds; Visual red lights triggered; 6 rapid-fire photos taken

When the AED is Removed

- ♥ Immediate alerts can be sent via SMS / text to target emergency contact(s)
- ♥ Second burst of 6 rapid-fire photos taken

AED Sensor Monitors

- ♥ AED Presence
- ♥ AED Operational Status & Readiness

Basic Program Management Services

AED Rx, automated email reminders & tracking for all battery & pad expirations, maintenance items, CPR/AED training records, and monthly inspections
